

## Supplementary Materials

**Fig. S1.** Denaturing gradient gel electrophoresis (DGGE) profile of PCR-amplified 16s rDNA extracted from a phenol enrichment culture. 1, 2, 3, and 4 on the graph were identified as *Alicydiphilus denitrificans* K601, Uncultured *Alicylophilus* sp., *Alicylophilus* sp. R-2461, and *Acidovorax aerodenitrificans*.
